

DESCRIPTION: 25W 1.5KVDC Isolated Wide Input Voltage DC/DC Converters

The rated output power of PP25DG converters is 25W, 2:1 and 4:1 wide input voltage range, the voltage range is 9V-18V, 18V-36V, 36V-72V, 9V-36V and 18V-72VDC. The accuracy of the converter can reach $\pm 1\%$, it can be widely used in telecommunications, railway transportation, instrument and etc.

FEATURES

25W output power	2:1&4:1 input voltage range	Over current protection
1.5KVDC isolation	Fixed switching frequency	Super capability with capacitive load
Metal shielding package	Input under voltage protection	Operating temperature : -40°C to 85°C
RoHs compliance	/	/

MODEL SELECTION																																											
RECOMMEND CIRCUIT																																											
<p>Single Output</p>																																											

RECOMMEND CIRCUIT

Dual Output:

- Add input capacitance C_{in} is helpful to improve the electromagnetic compatibility, recommend C_{in} use 47 uF-100uF of the electrolytic capacitors.
- If the module connect to the digital circuits, please add the C_{out} , C_{out1} , C_{out2} .
- If C_{out} , C_{out1} , C_{out2} value is too high or lower ESR, it will cause the module instable,
- The recommended value of C_{out} , C_{out1} , C_{out2} should be 100 uF/A, the current here means the output current.

Trim application & Trim Resistance

Raise the output Voltage Down the output voltage

- In dual and triple output modules, this application can just used in the main load(auxiliary load change together with the main load)

USING ATTENTIONS

- Module will cause irreversible damage when in the state of the input reverse polarity.
- Module will cause irreversible damage when in the long-term overload conditions.
- Module will cause irreversible damage when out of the maximum input voltage range.
